Microsoft Power BI
Introduction

📅 Duration: 1 day
👥 Ideal Group Size: 6-8 people

Course overview

Power BI enables you to connect to and transform data from a variety of sources. This allows you to produce detailed reports through a comprehensive range of visualisations.

This workshop will allow delegates to gain a thorough understanding of the complete Power BI cycle by working with real world examples and will equip you with the necessary skills to start applying your knowledge.

Topics covered

Power BI process

Connecting to file based data

Connecting to service based data cloud

Data gateways

Data manipulations

Data modelling

Column operations

DAX language

DAX functions

Related columns

Date calculations

Date calculations
